Introducing

The **Handi-Weld**

and  
**Handi-Weld**  
*Economy*

These kits allows you to create your own belts ... when you need them ... at your site ... using our industry proven round or flat **Pyrathane** polyurethane extrusions.  
*Handy for prototyping or quick repairs.*

### Belt Welding Kits

**Designed by People that build belts!**

Contain all you will need to create finished belts except the **Pyrathane** extrusion.

- Welding Fixture
- 110-V 40 Watt Heat wand
- Heat wand stand (not shown)
- TFE coated welding tip
- Flush Cut trim tool
- Welding instructions

Note: Wand temperature is preset specifically for polyurethane.

Kit is provided in a handy carrying case.

**The Handi-Weld Kit** will weld flat extrusions up to 1-1/2" in width and round extrusions from 1/16" up to 9/16" in diameter. An easy-grip handle makes belt welding easier.

**\$255.00**

**The Handi-Weld Economy kit** is suitable for round belts. Welds round cord in diameters from 1/16" up to 9/16" in.

**\$195.00**

Easy-grip handles not included but are available.

**Pyramid Inc. manufactures finished belts of flat and round cross sections in both large and small quantities at competitive prices. Please contact us for pricing information**
